PROJECTS

Bill4Food | A Software for College amenity **2026**

Built Bill4Food, a restaurant billing and management platform using React.js, Three.js, and Node.js. Developed responsive user interfaces, backend APIs, and database integrations for order management, automated billing, invoice generation, sales analytics, and real-time transaction tracking, enhancing operational efficiency and customer experience.

Trinetra | A Border Surveillance for tracking movements **2026**

Built Trinetra, an AI-driven surveillance platform using React.js and Python. Implemented real-time video analytics, object detection, movement tracking, anomaly identification, and automated alert generation to improve situational awareness and support rapid decision-making.

Maruthuvan | A Medical system for Government Hospitals

Built Maruthuvan, a digital healthcare platform designed to improve access to medical services in rural communities. Built a responsive frontend using Next.js and developed backend services to manage patient records, appointment scheduling, emergency assistance, and teleconsultation workflows. Implemented secure data management, real-time communication, and scalable APIs to enhance healthcare accessibility, streamline healthcare services, and improve user experience.
